CAPACITY

- 18 bottles (750ml wine bottles)

DOOR

- Tinted anti-UV glass door
- 3 layered glass door
- Reversible door

TEMPERATURE

- 4°C-18°C temperature range
- Temperature alarm
- Temperature memory setting
- Temperature display panel
- >65% humidity

NOISE

- 45db/A

Standard Option - Product Colour

Black Glass

THE FIVE ESSENTIAL RULES OF WINE STORAGE

ILVE wine cellars ensure your wines are stored in the ideal cellaring conditions by respecting these 5 wine storage rules;

1. STABLE TEMPERATURE BETWEEN 12°C - 14°C

Daily and weekly temperature fluctuations denature your wines. In particular, temperatures above 25°C will ruin wine within a couple of weeks and create 'spoiled fruit' flavours.

2. HUMIDITY ABOVE 50%

Levels lower than this cause corks to dry out and shrink, allowing damaging air into the wine, creating oxidation and off-odours.

3. DARK STORAGE AREA

All light should be avoided, but the UV light in particular: it creates hydrogen sulphide compounds in wine and affects the tannins and the colour of your wine.

4. NO VIBRATIONS

Imperceptible vibrations prematurely deteriorate wine by speeding up chemical reactions and ageing.

5. AIRFLOW

Lack of appropriate ventilation and air change makes wine cellars become stale and mouldy.
